### **DETAILED ACTION**

1. This Office Action is the First Office Action on the merits.

#### **Status of Claims**

2. Claims 1-10 are pending.

#### ***Information Disclosure Statement***

3. The information disclosure statement filed March 22, 2004 has been considered.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tadatomo et al. (US 6,225,650).

Tadatomo et al. teaches a semiconductor device deposited on a surface suitable for epitaxial growth having a first lattice constant and a first thermal evaporation rate (Abstract, col. 13, lines 9-25, col. 15, lines 15-30). Tadatomo et al. shows the semiconductor device being a laser diode or a heterojunction bipolar transistor (col. 5, lines 15-16, col. 8, line 47-54). Tadatomo et al. discloses a lattice-mismatched layer deposited on a surface and having at least one local dislocation (Fig. 1(a)-1(b), 12(a), col. 4, lines 5-35, col. 10-, lines 40-45). Tadatomo et al. teaches a cap layer formed over

the lattice-mismatched layer and at the cap layer is not covering at least one dislocation (Fig. 1(b), 4, 12(a), col. 4, lines 15-38).

Tadatomo et al. does not specifically show the method steps as claimed. However, even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). In re Marosi, 710 F.2d 798, 802, 218 USPQ 289, 292 (Fed. Cir. 1983).

Therefore, it would have been obvious to a person of ordinary skill in the art at the time of the invention to recognize that the structure disclosed by Tadatomo et al. is equivalent to the structure claimed because there is not any non-obviousness difference between the two final products.

Furthermore, When the PTO shows a sound basis for believing that the products of the applicant and the prior art are the same, the applicant has the burden of showing that they are not." In re Spada, 911 F.2d 705, 709, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990).

"The Patent Office bears a lesser burden of proof in making out a case of prima facie obviousness for product-by-process claims because of their peculiar nature" than when a product is claimed in the conventional fashion. In re Fessmann, 489 F.2d 742, 744, 180 USPQ 324, 326 (CCPA 1974). Once the examiner provides a rationale tending

Art Unit: 2822

to show that the claimed product appears to be the same or similar to that of the prior art, although produced by a different process, the burden shifts to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product. In re Marosi, 710 F.2d 798, 802, 218 USPQ 289, 292 (Fed. Cir. 1983).
